

PRESS RELEASE

Tops Children Make an Autumn Themed Visit to Reside Care Home

Children from **Tops Day Nursery** visited **Reside Care Home** in Christchurch in October to give the elderly residents some **Autumn collages** they had made at their Wimborne nursery. The children sang songs and talked with the residents and coloured in some Halloween pumpkin pictures which they gave to them wearing spooky masks.

The care home manager, Robert Paton created a notice board in the home especially for the children's pictures to be displayed. The children will be paying regular visits to see the residents and can add to the notice board each trip.

Robert Paton, Care Home Manager said: *"The residents love to see the children and it brightens up their day when they come and sing songs and show them their pictures. The new notice board in the home will record their visits with photographs and artwork and it will be a reminder to the residents of the children who will come again. We give the children squash and biscuits while they are here and they enjoy their trip to see us too!"*

Tops Day Nurseries and Reside Care Homes are both part of Hadland Care Group, the Bournemouth based company that also owns UK leading Training provider Aspire Training Team.
